

## **Kim R. Robeson Memorial Award Student Grant Application Form**

To honor the memory of Kim Robeson, the Utah State University Department of Geology has established the Kim R. Robeson Memorial Award to support small grants that will support student-organized field trips or research. The department solicits mini-proposals from graduate students to support preliminary fieldwork, sampling, travel, and research-related activities such as travel for analytical services. Preference will be given to mini projects that include other students or department staff — as field or lab assistants. Graduate students initially will be limited to two (2) awards during their time at USU.

Please fill out the following information to be considered for this award and submit this form in the Department of Geology main office.

Name: \_\_\_\_\_

Project Title: \_\_\_\_\_

Short Description of Project Objectives [200 words maximum]

Please describe how funding will be used. Include the nature of student learning and research outcomes that are likely to result and an approximate budget plan. Include the number and name[s], if possible, of other students who will participate, and describe your current funding situation. After the work is completed, the awardee will provide a 1-page (maximum) report of outcomes. All expenses and travel will be performed according to USU guidelines and must be coordinated with personnel in the Utah State University Department of Geology main office.
