February 2015 Geology Advisory Board Recommendations

1) Room for improved communication across the board (students and faculty).

2) Lecturers and concurrent enrollment faculty need to be more included in the department—they represent the department to a wide group of potential majors.

3) Problem of bringing field component to distance education environment---maybe have a traveling TA that can do this. Faculty is very concerned about this.

4) More access to department website.

5) Inventory of computing equipment in the department.

6) Bring all development in house instead of campus-wide fundraising drives.

7) Dave and Jon should follow-up with Tad Shirmer to explore annual support of the Department.

8) Keep up the thank you notes for all donations.

9) In general, this is one of the best years in the last five years.
