

Feed & Feedback 2012

5 students present

Student Comments

Courses

- Not enough exposure to air photos prior to taking GEO 4700 - Field Methods.
- Should use Google Earth more in courses.
- Little or no overlap between GEO 3200, 3550 and 3700.
- Diversity of specializations allows for a broad background.
- Need a 4000/5000 level Geology GIS class.
- Computer Science 1400 not useful.
- WATS GIS class teaches the basics, but not practical for geological applications.
- Chemistry and Physics labs are not very helpful and often taught by teaching assistants with poor English skills.
- Good non Geology courses are Soils, Geoarcheology, Physics II lecture, Chem I lecture.

Computers

- Computers are great!
- Appreciate help of undergraduate computer technician.

Miscellaneous

- Undergraduate research opportunities are great.
- Microscopes are OK.
- Other geology equipment is fine.
- Meet & Greet each semester is a great way to get to know the professors.
- Do not feel intimidated by the professors.
- Geology Advisory Board is very helpful.
- Interactions with other departments are good.
