

## **Feed & Feedback**

**April 27, 2016**

8 students present

### **Student Comments**

#### **Courses**

- If not on track (out of sequence), it is difficult to graduate in four years.
- GEO3200 - Earth Through Time - should be offered both Fall and Spring semesters.
- The timing of Structure (Spring) and Field Methods (Fall) can be an issue for some.
- Good to offer Field Camp every year.
- Might be good to offer a combined Field Camp and Field Methods every other year.
- A longer (6-8 week) Field Camp could be a hardship (financial, family) for some.
- CoS required courses are fine.
- The USU Geology program provides students with a really good preparation for grad school or employment.

#### **Computers**

- Aquasol will not work on Windows 10!
- Adobe needed on all computers in G207.

#### **Miscellaneous**

- Remove the partly filled rock display case from G207 - it is only used to drape maps on.
- Undergraduate Summer Field Assistant Program is great.
- Four of eight present did undergraduate research and thought it was a valuable experience.
- Good to have "Applying to Graduate School" forum earlier in Fall Semester.
- Faculty are outstanding.
- Professors are very caring and personable.
- The USU Geology community is tight knit.
- The Oldham Room is great.
- Advertise Professional Geologist Exam every semester.
- Would be good to have a seminar on how to prepare and apply for geoscience jobs.
